

NETWORK COLLECTOR

Knowing where your data is going at all times of the day or night is your ticket to peace of mind. The Network Collector puts eyes on every server session, continuously auditing where your data is traveling.

The Network Collector is an on premise or cloud virtual security appliance with licensing that includes the Visibility Portal product. HOPZERO's collector provides unattended real-time operation for compliance standards logging and actionable exfiltration alarms. Alarms can be configured to send to central security consoles, making visualization map viewing optional – however, seeing where data is traveling enables rapid understanding, and HOPZERO's deep security research tools provide motivation to use it regularly. The Collector renders graphical presentation of the current attack surface delivering “a picture is worth a thousand logs”.

Smart Logs Improve Compliance.

Logging every communication session provides compliance with NIST, GDPR, HIPAA, PCI, ISO 27001, and all security standards. Concise logs add security research enhancements, building smart logs to include the Who, What, When, Where and Why. Smart logs help differentiate a sophisticated state sponsored actor from a lone script kiddy hacker. Speed, distance, latency and volume combined with threat intelligence lookups, build a powerful risk score, zeroing in on material risks. DataTravel™ Compliance Logging exports to Excel, Or other SIEM or logging systems. Network Collector integrates raw device event logs to deliver user session context, enhanced smart security & performance session metrics. Actionable alarms notify of any attempt made to access vital data from outside the Sphere of Trust™. The system integrates with other vendors and has features to collaborate across organization lines.

Only IP addresses and session meta-data is collected or stored by our products. Payload data is not collected. Network Collector with Visualizer Portal rapidly validates actual and potential exfiltration proving an organization's effective security or reveals data leaks. All information collected is encrypted in transit and at rest.

Client ID	Peer	Port	App	Server IP	Server	Server	Server	Host	Host	Host

About HOPZERO

HOPZERO is an Exfiltration Prevention solutions developer. Audits and proactive security solutions allow companies to protect their private data. HOPZERO products are managed with a unified SaaS management platform providing enterprise wide visibility and safe data containment policy enforcement. HOPZERO security systems eliminates complexity and training gaps normally associated with enterprise systems.
