Smart Session Recorder

Knowing where your data is going at all times of the day or night is your ticket to peace of mind. The Smart Session Recorder puts eyes on every server session, continuously auditing where your data is traveling.

The Smart Session Recorder (SSR) is an on premise or cloud virtual security appliance with licensing that includes the SaaS Auditor product. HOPZERO's SSR provides unattended real-time operation for compliance standards logging and actionable exfiltration alarms. Alarms can be configured to send to central security consoles, making visualization map viewing optional – however, seeing where data is traveling enables rapid understanding, and HOPZERO's deep security research tools provide motivation to use it regularly. The SSR renders graphical presentation of the current attack surface and "a picture is worth a thousand logs".

"Smart Logs Improve Compliance"

Logging every communication session provides compliance with NIST, GDPR, HIPAA, PCI, DoD, and all security standards. Concise logs add security research enhancements, building smart logs to include the Who, What, When, Where and Why. Smart logs help differentiate a sophisticated state sponsored actor from a lone script kitty hacker. Speed, distance, latency and volume combined with threat intelligence lookups, build a powerful risk score, zeroing in on material risks. DataTravel™ Compliance Logging exports to Excel, Splunk, LogZilla or ELK Elastic Search. Integrating raw device event logs brings user session context with HOPZERO's enhanced smart security & performance session metrics. Actionable alarms notify of an attempt made to access vital data from outside the Sphere of Trust™. The system integrates with other vendors and has features to collaborate across organization lines.

DataTravel™ Compliance Smart Logging

Only IP address meta-data is collected or stored by our products. SSR with Auditor rapidly validates actual or potential exfiltration proving an organization's effective security or reveals data leaks. All meta-data is encrypted in transit and at rest.

Smart Session Recorder includes all the HOPZERO SaaS Auditor. Get graphical geo maps and export data to create custom reports.

About HOPZERO
HOPZERO is an Exfiltration Prevention solutions developer. Audits and proactive security solutions allow companies to protect their private data. HOPZERO products are managed with a unified SaaS management platform providing enterprise wide visibility and safe data containment policy enforcement. HOPZERO security systems eliminates complexity and training gaps normally associated with enterprise systems.
